

Bidmate/Partmate New Features in Update 18.0.8344.204

This update includes new features that will make your workday a bit easier. We're excited to tell you about them! These new features include:

- Bidmate/Partmate/Partmate Review: See Sales History for Parts
- Bidmate: **Enter Price for Part** Now Displays List Price
- Partmate: Part Filters in Show Parts View on **Parts** Tab
- Partmate Loose Parts: View Full Part Name on **Find Vehicle** Window
- Partmate Review: Work Order Parts Identified on **Dismantling Instructions Report**

Keep reading to discover how these new features work.

Bidmate/Partmate: See Sales History for Parts

Sales history for a part can now be easily viewed in Bidmate, Partmate, and Partmate Review (as long as you are connected to Checkmate).

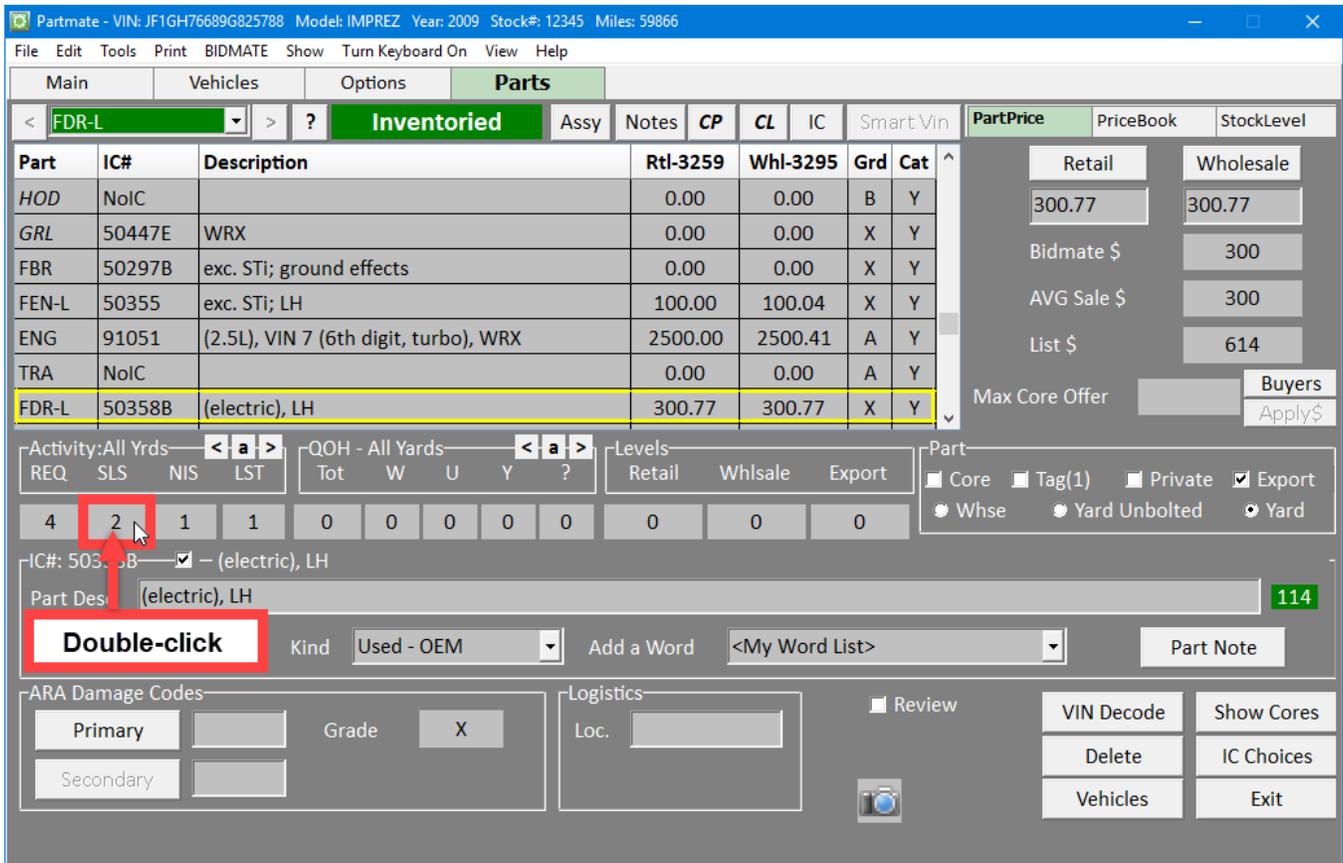

In Bidmate's **Evaluate Parts** window, while you're evaluating the parts on a vehicle, you can now double-click on the **Sold** column to see the sales history detail for that part.

A window appears showing sales history detail for that part.

IMPREZ	10	10/23/17	A	300.00	161209	124865	SUNDERHAUS AUTO REPAIR	Cash	JOE

In Partmate and Partmate Review, sales history detail for a part can be accessed on the **Parts** tab while reviewing and inventorying parts. To see the sales history for the selected part, locate the **Activity** section and double-click on the number in the **SLS** (sales) column to display the sales history.

Bidmate: List Price Included in Enter Price for Part Window

In Bidmate's **Evaluate Parts** tab, you can double-click on a part line in the **Price** column to enter a price for that part. With this release of Bidmate, the **List Price** now displays on the **Enter Price for Part** window for you to reference when entering a part price.

Partmate: Part Filters in Show Parts View on Parts Tab

New filters have been added to the **Parts** tab that allow you to easily identify inventoried parts that are missing information. Here's how it works:

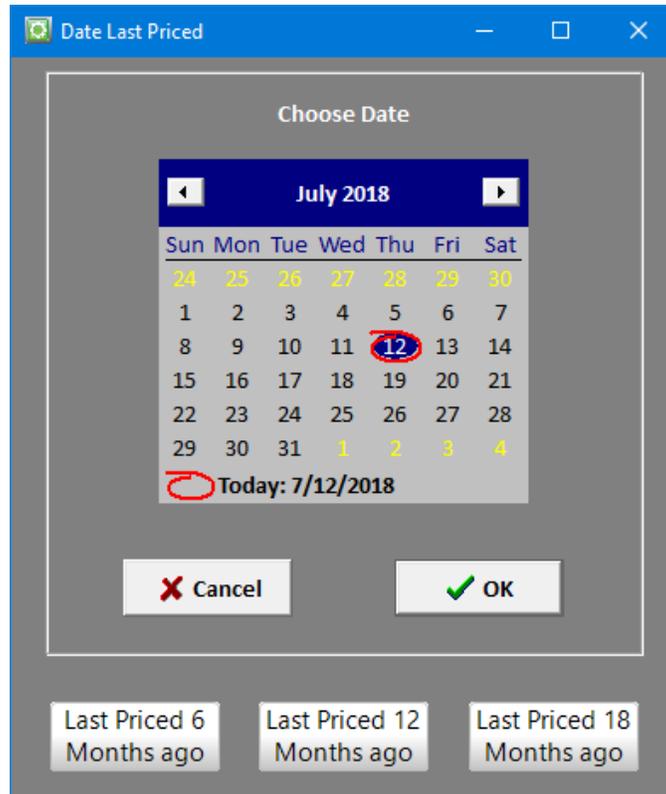

1. On the **Parts** tab, click **Show Parts** to view all inventoried parts for the vehicle.
2. In the list of parts, right-click on any part row.
3. In the menu that appears, the **Show** options allow you to select which parts you want to show in your list, according to the information available for that part.

The screenshot displays the Partmate software interface. The top window title is "Partmate - VIN: JF1GH76689G825788 Model: IMPREZ Year: 2009 Stock#: 12345 Miles: 59866". The main menu includes "File", "Edit", "Tools", "Print", "BIDMATE", "Show", "Turn Keyboard On", "View", and "Help". The "Parts" tab is active, showing a table of inventoried parts. A red box highlights the "Right-click" action on a part row. The context menu is open, showing options like "Delete", "Duplicate Part", "Hide Uploaded Parts", and "Show". The "Show" menu is expanded, listing various filters such as "Body parts w/o ARA Damage", "Date Last Priced", "Review Parts", "Ungraded", "Unimaged", "Unpriced", "Unresolved", "Untagged", and "All". The "All" option is selected with a blue checkmark. The interface also shows various filters and controls for the parts list, including "Activity: All Yrds", "QOH - All Yards", and "ARA Damage Codes".

ENG	91051	(2.5L), VIN 7 (6th digit, turbo),			A	Y
TRA	NoIC				A	Y
FDR-L	50358B	(electric), LH			X	Y

To filter which parts you want to see, choose from the following **Show** options:

- **Body parts w/o ARA damage** – Display only body parts that are eligible to have an ARA damage code but do not have one assigned.
- **Date Last Priced** – Display parts that have not had a price change since a specific date. When you select this option, the **Date Last Priced** window displays. Select a date and click **OK**. All parts that have not had a price change since before that date will display. You can also use the date buttons at the bottom of the window to quickly select to show parts that have not had a price change in more than **6, 12, or 18 months**.

- **Review Parts** – Only parts that have been flagged for review will display.
- **Ungraded** – Only parts that do not have a grade assigned will display.
- **Unimaged** – Only parts that do not have images associated with them.
- **Unpriced** – Only parts that do not have a part price entered will display.
- **Unresolved** – Only parts that were assigned an unresolved interchange will display.
- **Untagged** – Only parts that have not been added to the tag queue will display.
- **All** – All parts that have been inventoried on the vehicle will display.

If you set a filter option, this filter remains selected for the rest of the current session of Partmate, even when you view the parts for a different vehicle. You can reset the filter by right-clicking on a part and selecting the **All** option to view all parts inventoried for a vehicle.

Partmate: View Full Part Name on Find Vehicle Window

A new button has been added to the **Find Vehicle** window that displays the name of the selected part. This allows users that are unfamiliar with part codes to view the full names of the parts that are inventoried for a vehicle.

To view the full name of the selected part, click on the **?** button (shown below). The **Part Name** window opens, displaying the full name of the part that is currently selected on the **Inventoried Parts** list. Leave this screen open and the full name of each part you choose in the list will be displayed.

The screenshot shows the 'Find Vehicle' window with the following details:

- Model: CAMRY
- Year: 2005
- Range: 2010

The 'Inventoried Parts' table is as follows:

The 'Part Name' pop-up window displays: **ABK = ANTI-LOCK BRAKE PARTS**. A red arrow points from the '?' button in the 'Inventoried Parts' table to the pop-up window.

Partmate Review: Work Order Parts Identified on Dismantling Instructions Report

A new section has been added to the **Dismantling Instructions Report**. Now, if any parts on a vehicle have been added to a work order, these parts will print at the top of the report (see below). This lets your dismantler know which parts have a higher priority to be removed from a vehicle.
